CONTINUATION

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream system.

An appropriative right is required for use of water on non-riparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. After the formation of the California Water Commission back on December 19, 1914, new appropriators have been required to obtain a permit and license from the State. Appropriative rights can be granted to waters "foreign" to the natural stream system.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users as set forth in Water Code section 5100 with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

Types of surface water rights in California. They are riparian and appropriative rights.

Riparian rights are those which give the owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in contact with the water source and must never have been severed from the sources of supply by an intervening parcel without the consent of the riparian water users. Generally, a riparian water user must share the water supply with other riparian users. Appropriative rights are those which give the owner of land the right to divert the natural flow of a stream but may not be used to store water for later use or divert water which originates in the stream or previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream.

Permit rights are those which give the owner of land the right to use water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised without the consent of riparian water users. Since 1914, new appropriators have been required to obtain a permit and license from the State. Appropriative rights can be granted to waters "foreign" to the natural stream system.

Record of Water Use must be filed by riparian and pre 1914 appropriative water users as set forth in Water Code section 5100. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone appropriates water upstream from their diversions, and (3) assists the State to determine if additional water is available for future use.

For general information. For more specific information concerning water rights, please contact an attorney or the State Water Resources Control Board. Several pamphlets are available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights, and (3) Appropriation of Water in California.

Water is a precious resource facing California is real. Every California needs to take immediate action to reduce energy consumption. Ways you can reduce demand and cut your energy costs, see our Web-site at <http://www.swrcb.ca.gov>

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

- "Statements of Water Diversion and Use"
- "Information Pertaining to Water Rights in California"
- "Water Rights for Stockponds Constructed Prior to 1969"
- "Appropriation of Water in California"

STATEMENT OF WATER DIVERSION AND USE

S 4196

This statement should be typewritten or legibly written in ink.

- A. Name of person diverting water Scott Lumber Company, Inc.
Address Post Office Drawer AA, Burney, California 96013
- B. Name of body of water at point of diversion Unnamed stream (Pt. # 20 on map S 4177)
Tributary to Burney Cr.
- C. Place of diversion NW 1/4 NE 1/4 Section 24, Township 34 N, Range 2 E, MD B&M, Shasta
County, or locate it on sketch of section grid on reverse side with regard to section lines or prominent local landmarks.

D. Name of works Water hole & Spring

E. Capacity of diversion works
Capacity of storage reservoir
State quantity of water used each month in gallons or acre-feet

Year	Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.	Total Annual

If monthly and annual use are not known, check months in which water was used. State extent of use in units, such as acres of each crop irrigated, average number of persons served, number of stock watered, etc.

Maximum annual water use in recent years
Minimum annual water use in recent years
Type of diversion facility: gravity, pump
Method of measurement: weir, flume, electric power meter, water meter, estimate

F. Purpose of use (what water is being used for)
G. General description or location of place of use (use sketch of section grid on reverse side if you desire)

H. Year of first use as nearly as known
I. Name of person filing statement Calvin T. Martin
Position Secretary & Treasurer Organization Scott Lumber Company, Inc.
Address Post Office Drawer AA, Burney, California, Califor
